IMS 2007 Student Volunteer Request

Why do you need my help?

As you may or may not know, the International Microwave Symposium (IMS) is the largest global conference for professionals in the radio frequency and microwave technical fields. With approximately 10,000 attendees from around the world, technical papers describing state of the art research and development are presented throughout this week-long conference in early June. In addition to the technical program, many exhibitors come to showcase their latest product line offerings.

Imagine the manpower required to:

- Register 10,000 attendees
- Hand out 1,000 workbooks
- Provide 20,000 lunches
- Provide directions to attendees for whom English is not a first language

As you can imagine, we need your help!

When and where is the conference?

This year, IMS will be held at the Hawaii Convention Center in Honolulu, Hawaii from June 3-8, 2007. Additional details about the conference are available online at <http://www.ims2007.org>.

Why should I volunteer?

This year, we have set up a private lounge just for student volunteers. The student volunteer lounge has a number of free amenities such as: meals, couches, chairs, wireless internet access... basically a great place to just relax and hang out during the hectic conference week.

Each student volunteer will also receive a free IMS 2007 t-shirt for helping with the conference.

And, of course, there are a number of opportunities for professional growth and networking throughout the week. Student-centric events, like the Student Reception, Student High-Efficiency Power Amplifier Competition, Student Paper Competition, and Student Awards Banquet are excellent for meeting student peers from many other universities. Access to technical sessions and the exhibition floor provide a great experience and opportunity for growth by being at the premier conference for radio frequency and microwave engineering.

How do I sign up?

We greatly appreciate everyone's help. If you would like to sign up to volunteer for the conference, please contact Justin Akagi at [akagij\[at\]gmail.com](mailto:akagij[at]gmail.com).
